

QUALITY POLICY

Quality Management is a strategic tool to reach excellence in Services and Products delivery and to support COMAU processes and operations control.

COMAU Management has therefore defined this Quality Policy in which it is committed to:

- Meet Customers' expectations and measure their satisfaction;
- Disseminate both the Quality Policy and the Quality documentation inside the organization while training all personnel to ensure the highest level of technical standards with a strong commitment to Quality;
- Motivate the employees by providing a professional work environment, appropriate training initiatives and workshops to boost their creativity and qualifications;
- Provide proper resources and funding to support continuous improvement and training activities;
- Develop, maintain and review the Quality Management System in order to be compliant with all relevant international standards, guidelines and requirements;
- Develop and manage company processes, including the use of tools, techniques and performance metrics to support continuous improvement activities and to improve the effectiveness of the Quality Management System;
- Design, manufacture and commission innovative systems with a high standard of reliability and maintainability;
- Perform Project Management and Project Execution using integrated multifunctional teams with effective risk management;
- Perform Supplier management in accordance to the expected Quality requirements;
- Evaluate and manage the risks and opportunities associated with organization's context and objectives.
