Comau presents its factory-proven e-mobility solutions at CWIEME 2019

The leading all-in-one provider for every steps of the E-Vehicle value chain

Berlin, May 21, 2019 – Comau, a global leader in advanced industrial automation products and integrated production systems, presents its competencies, innovative products and technologies and consolidated experience that are driving its leadership in the E-Mobility industry. “Know How. Right Now. The forefront of mobility” is the concept behind Comau’s ability to support the customer in each area of the E-Vehicle manufacturing process. From batteries, E-Motor and drivelines to internal combustion engine (ICE) and body assembly, Comau is hard at work assisting both established OEMs and new players with their electric and hybrid vehicle manufacturing needs.

For the first time at CWIEME 2019 (Berlin, 21-23 May – booth 31A02), Comau openly discusses how its vast portfolio of products and technologies combine standard modularity, scalable flexibility and innovative digital features to support different E-Mobility production paths from pilot projects to high volume production systems. The company reveals how it is helping customers all over the world meet the dynamic demands of the market in a highly competitive timeframe – from product industrialization and prototyping to production support through engineering, manufacturing and commissioning.

“Comau’s commitment in the field of E-Mobility represents the continuous capacity of innovation that distinguishes our company to remain always one step ahead in a very competitive market,” emphasized Gianfelice D'Ippolito, Comau Head of E-Mobility Sales EMEA. “Thanks to 45+ years of experience in industrial automation worldwide and 40+ E-Mobility projects already deployed in Europe and around the world, Comau remains a single source provider for comprehensive manufacturing technologies and systems for electric and traditional vehicles”

In the booth, Comau showcases also some of its latest in cutting-edge technologies: MATE (Muscular Aiding Tech Exoskeleton), the wearable exoskeleton designed to improve work quality in a highly ergonomic manner by providing movement assistance to the operator during repetitive, as well as daily tasks; and e.DO, a modular, multi-axis articulated robot with integrated open-
source intelligence designed to make learning and programming fun and more interactive.

About Comau

Comau, a member of the FCA Group, is a worldwide leader in delivering advanced industrial automation products and systems. Its portfolio includes technology and systems for electric, hybrid and traditional vehicle manufacturing, industrial robots, collaborative and wearable robotics, autonomous logistics, dedicated machining centers and interconnected digital services and products able to transmit, elaborate and analyze machine and process data. With over 45 years of experience and a strong presence within every major industrial country, Comau is helping manufacturers of all sizes in almost any industry experience higher quality, increased productivity, faster time-to-market and lower overall costs. The company’s offering also extends to project management and consultancy, as well as maintenance and training for a wide range of industrial segments. Headquartered in Turin, Italy, Comau has an international network of 32 locations, 14 manufacturing plants and 5 innovation centers that span 14 countries and employ more than 9,000 people. A global network of distributors and partners allows the company to respond quickly to the needs of customers, no matter where they are located throughout the world. Through the training activities organized by its Academy, Comau is also committed to developing the technical and managerial knowledge necessary for companies to face the challenges and opportunities of Industry 4.0
