

## COMAU OBTAINS ISO/IEC 27001:2013 CERTIFICATION, INTERNATIONAL STANDARD FOR INFORMATION SECURITY MANAGEMENT

Turin, July 16, 2020 - Comau S.p.A. has obtained ISO/IEC 27001:2013 certification attesting to the conformity of its Information Security Management System (ISMS). Structured in policies and procedures, the system is designed to ensure the security of Comau and its customers' information management.

ISO/IEC 27001:2013 certification represents a value for the company and its customers as it is a useful tool to guarantee the confidentiality, integrity and availability of the data that Comau manages on a daily basis. Information is an important asset and a resource for Comau. As such, it must be protected and managed appropriately to avoid threats and mitigate risks induced by malicious or inadvertent actions, resulting in data loss and the invasion of privacy.

Protecting information security has increasingly become an issue of crucial importance for companies. It is especially pertinent with the arrival of Industry 4.0, which is characterized by the use of new digital technologies and the Industrial Internet of Things (IIoT), which enable an ever-increasing integration of IT (Information Technology) and OT (Operation Technology) networks.

“Thanks to the conferral of this important certification, Comau has demonstrated the great attention it dedicates to Cyber Security,” says Stefano Boscolo Bozza, Global Chief Information Officer of Comau. “Today more than ever, in a context where the transfer of information is an integral part of industrial activities, it is essential to ensure maximum protection and appropriate management of information shared internally and with our partners.”

The acquisition of this certification by Comau S.p.A. is part of the continuous improvement of Cyber Security that the company is developing on a global level.

PRESS RELEASE

## About Comau

Comau, a member of the FCA Group, is a worldwide leader in delivering advanced industrial automation products and systems. Its portfolio includes technology and systems for electric, hybrid and traditional vehicle manufacturing, industrial robots, collaborative and wearable robotics, autonomous logistics, dedicated machining centers and interconnected digital services and products able to transmit, elaborate and analyze machine and process data. With over 45 years of experience and a strong presence within every major industrial country, Comau is helping manufacturers of all sizes in almost any industry experience higher quality, increased productivity, faster time-to-market and lower overall costs. The company's offering also extends to project management and consultancy, as well as maintenance and training for a wide range of industrial segments. Headquartered in Turin, Italy, Comau has an international network of 7 innovation centers, 5 digital hubs, 8 manufacturing plants and employs more than 9,000 people in 14 countries. A global network of distributors and partners allows the company to respond quickly to the needs of customers, no matter where they are located throughout the world. Through the training activities organized by its Academy, Comau is also committed to developing the technical and managerial knowledge necessary for companies to face the challenges and opportunities of Industry 4.0.
